Gevorg Aghajanyan

Senior Software Engineer
Yerevan, Armenia | (+374) 44 121 666 | gev.aghajanian@gmail.com
Portfolio: LinkedIn | GitHub

Professional Summary

Senior Software Engineer with extensive experience in web and mobile engineering across the full software development lifecycle. Expert in the JavaScript and TypeScript ecosystems, with specialized depth in React, React Native, and Expo. Proven track record of architecting high-performance web applications using advanced browser APIs (WASM, Web Workers), designing Node.js microservice gateways, and engineering real-time 2D game mechanics. Strong technical foundation in data structures, design patterns, SOLID principles, and leadership.

Technical Skills

- **Core Languages:** JavaScript (ES5+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React, React Native, Expo, Redux, Next.js, RxJS, Pixi.js(spine)
- **Backend & Tools:** Node.js, Webpack, Git, GitHub, GitHub Actions, Webpack, Vite, Vercel, MongoDB, GraphQL, JetBrains Suite (WebStorm)
- **Styling & Design Systems**: Tailwind, PostCSS, CSS-in-JS, Styled Components, BEM, Design System
- **Advanced Browser Tech:** WebAssembly (WASM), Web Workers, Web APIs
- **Performance & Web Standards**: Web Performance Optimization, Core Web Vitals, Code Splitting, Lazy Loading, Rendering Optimization
- **Analytics & Engagement**: Amplitude, Braze, Intercom, Google Tag Manager (GTM), Google Analytics
- **Engineering Practices:** OOP, SOLID Principles, Design Patterns, Clean Coding Standards, Data Structures

Professional Experience

Senior Software Engineer

Async | Full-time | Armenia
May 2022 – Present

- Architect and scale a high-performance audio and video editing web application using React and TypeScript to maximize processing speeds and cross-platform compatibility.
- Optimize frontend infrastructure by offloading heavy computational rendering and media processing tasks to Web Workers and WebAssembly (WASM), minimizing main-thread blocking.
- Leverage modern browser APIs to implement advanced asset optimization techniques,

drastically reducing bundle sizes and improving Core Web Vitals.
- Collaborate with cross-functional product teams to establish modern engineering standards, scale complex codebases, and deliver near-native web experiences.
- Utilize AI-assisted tools like Claude Code to accelerate development velocity, streamline coding workflows, and optimize feature implementation.
- Expand backend service functionality by implementing new features and data properties, applying full-stack skills to support end-to-end feature delivery.

Senior Software Engineer / Tech Lead
BetConstruct (Pascal Gaming) | Full-time | Armenia
March 2021 – May 2022

- Served as Tech Lead for Pascal Gaming, a major enterprise gaming division within the BetConstruct ecosystem.
- Engineered high-performance, real-time web arcade games leveraging Pixi.js and Spine for complex 2D animations and rendering optimizations.
- Spearheaded architectural decisions for game engines to ensure low-latency data handling and smooth, cross-browser performance.
- Mentored and trained incoming software engineers, standardizing modern JavaScript/TypeScript practices and accelerating onboarding delivery.

Senior Software Engineer
BeeGraphy | Part-time | Armenia
May 2021 – Jan 2022

- Developed and optimized high-performance, cloud-based 3D parametric and computational modeling tools running directly in the browser.
- Architected scalable web applications and real-time collaborative editors to ensure low-latency rendering and seamless user experiences.
- Mentored junior engineers and advocated for clean code practices, modern frameworks, and optimal file system/data management structures.

Senior Software Engineer
SFL LLC (acquired by DataArt) | Full-time | Armenia
November 2019 – January 2021

- Developed complex, secure web interfaces for a large-scale banking application utilizing React.js and modern state management.
- Built deep domain expertise in banking products, financial workflows, and secure data handling standards.
- Engineered and maintained a high-performance API gateway using Node.js to streamline communication and data aggregation across microservices.
- Collaborated closely with cross-functional teams to implement scalable frontend layouts, cross-browser optimization, and stable API connectivity.

Software Engineer / Team Lead
BetConstruct | Full-time | Armenia
June 2018 – November 2019

- Led a small, focused frontend development team, managing delivery timelines and standardizing state management workflows across web and mobile modules using

Redux.
- Engineered and shipped cross-platform web and mobile applications using React and React Native.
- Trained and onboarded junior engineers on modern React ecosystems, building component libraries, and optimizing hybrid application performance.
- Partnered with QA and product teams within an agile workflow to iterate quickly on key application features.

Front End Developer
Project Nulla | Full-time | Armenia
April 2018 – August 2018

- Developed a responsive e-commerce web application for an online food delivery platform, contributing to core user-facing functionality.
- Built foundational UI components using HTML5, CSS3, and core JavaScript to ensure consistent rendering across devices.
- Translated static design mockups into functional, cross-browser compatible layouts, delivering pixel-accurate implementations under tight timelines.

JavaScript and ReactJS Tutor

Basic IT Center | Armenia
*September 2017 – A*pril 2018

- Mentored and guided aspiring developers, helping them build foundational skills to successfully launch their software engineering careers.
- Designed and delivered a comprehensive technical curriculum covering HTML5, core JavaScript, React, and state management with Redux.
- Taught critical engineering concepts including modern Web API integration, asynchronous programming, HTTP request handling, and DOM manipulation.
- Conducted hands-on coding workshops and reviewed student projects to instill clean coding standards and efficient troubleshooting methodologies.

Education

- **Bachelor of Arts in Informatics and Applied Mathematics** | Yerevan State University (September 2012 – June 2020)
- **JavaScript Program Certification** | Armenian Code Academy (February 2017 – August 2017)

Languages

- **Armenian:** Native
- **English:** Intermediate
- **Russian:** Good
